Multicomponent Analysis of Replacement Liquids of Electronic Cigarettes Using Chromatographic Techniques

Evidence of Sulfur Mustard Exposure in Human Plasma by LC–ESI–MS-MS Detection of the Albumin-Derived Alkylated HETE–CP Dipeptide and Chromatographic Investigation of Its Cis/Trans Isomerism

Detection Times of Carboxylic Acid Metabolites of the Synthetic Cannabinoids JWH-018 and JWH-073 in Human Urine

First Reported Fatalities Associated with the ‘Research Chemical’ 2-Methoxydiphenidine

Stability of γ-Hydroxybutyrate in Blood Samples from Impaired Drivers after Storage at 4°C and Comparison of GC–FID–GBL and LC–MS-MS Methods of Analysis

Estimation of the Time Interval between the Administration of Heroin and the Sampling of Blood in Chronic Inhalers

The Rapid Measurement of Benzodiazepines in a Milk-Based Alcoholic Beverage Using QuEChERS Extraction and GC–MS Analysis

Determination of Buprenorphine, Norbuprenorphine and Naloxone in Fingernail Clippings and Urine of Patients Under Opioid Substitution Therapy

A Rare Fatality Attributed Solely to Metaxalone

A Fatal Case of Pentedrone and α-Pyrrolidinovalephrone Poisoning

Comparison of Urine to Oral Fluid and the Recommendation for Routine Drug Analysis for Driving Under the Influence Cases

Response to Comparison of Urine to Oral Fluid and the Recommendation for Routine Drug Analysis for Driving Under the Influence Cases

Specific Detection

Is your Opiate Assay specific enough for Hydrocodone? Also known as Vicoct or Lortab, Hydrocodone is one of the most abused prescription drugs in the United States. Toxicology laboratories have been using the opiate test to detect Hydrocodone in the past and have seen inadequate performance. The new Thermo Scientific™ DR® Hydrocodone/Hydromorphone Assay provides accurate and specific detection of hydrocodone/hydromorphone and major metabolites in human urine. This liquid, ready-to-use immunoassay shows excellent correlation with LC/MS. Applications are available on a range of clinical analyzers and provides fully automated qualitative and semi quantitative results. For Criminal Justice and Forensic toxicology use only.

Accurate Results
